

Architectural Foam

Catalog

Columns, cornices, moldings, trim, signage, and facade details.

ABC Foam Creations

abcfoam.com | 954.600.1628 | abcfoamcreations@gmail.com

BUILT FOR ARCHITECTS, BUILDERS, DESIGNERS, AND OWNERS

Stone presence. Foam speed.

ABC Foam Creations fabricates lightweight architectural elements that install faster than stone, cast concrete, plaster, or GFRC while preserving the visual language of traditional architecture.

Exterior Details

Cornices, bands, quoins, arches, medallions, brackets, keystones, columns, and facade accents.

Interior Features

Crown moldings, caps, bases, shutters, surrounds, and decorative profile elements.

Custom Profiles

Work from CAD files, sketches, photos, field dimensions, or a physical sample.

What makes the system practical

LOW WEIGHT

Easier handling at elevation.

FAST INSTALL

Long runs arrive ready to place.

DURABLE SKIN

Hardcoat and mesh systems.

FINISH RANGE

Stone, stucco, plaster, or paint.

REFERENCE GUIDE

A focused architectural catalog.

Every section in this guide is focused on architectural foam: exterior facade elements, interior trim, profile references, signage structures, and installation-ready components for residential and commercial projects.

Columns, Caps & Bases

Classical and contemporary column profiles with cap and base options.

Cornices & Moldings

Crown profiles, bands, trims, dentils, and repeated molding runs.

Sills & Surrounds

Window sills, midbands, surrounds, headers, and facade breaks.

Arches & Medallions

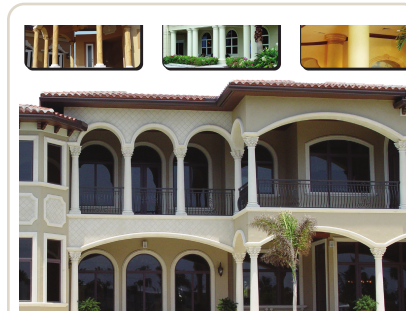

Radius, gothic, partial-radius, keystone, and decorative medallion work.

Brackets & Pediments

Wall caps, parapet caps, brackets, pediments, and facade accents.

Architectural Signage

Monument-style sign bodies and exterior sign structures.

BUILT FOR FIELD CONDITIONS

Specify the finish, not the weight.

Architectural foam can be shaped, coated, textured, and finished for interior or exterior conditions. ABC Foam can adapt the coating system to the project environment, desired surface, and installation method.

Typical coating stack

Final build-up is selected for the project location, profile size, finish, and exposure.

Core

EPS or high-density foam selected for profile size, handling, and install conditions.

Hardcoat

Basecoat, mesh, cementitious, epoxy, polyurea, or specialty coating systems as needed.

Finish

Smooth paint, stucco texture, limestone tone, plaster effect, concrete look, or custom match.

Install

Pieces can be fabricated with joints, returns, backing, anchoring points, and labeled runs.

HOW TO SEND A CLEAN REQUEST

From concept to installed detail.

The fastest quote starts with clear dimensions and context. ABC Foam can work from a full plan set, CAD file, marked-up elevation, reference photo, physical sample, or a rough sketch.

- 1

Send references
 Drawings, photos, measurements, profile samples, finish goals, and project location.
- 2

Confirm system
 Foam density, coating method, finish, installation needs, and environmental exposure.
- 3

Fabricate
 Cut, carve, coat, texture, label, package, and prepare for delivery or installation.
- 4

Install
 Coordinate sequence, anchoring, joints, touch-up, and final finish protection.
